

I'm against any revision that would allow a few conglomerates to own more media (we already get our information through a very limited number of sources, regardless of the number of channels or radio stations), but I also know for a fact that this is a change that is being forced on the public without due notice to allow for debate. Please do not permit this to happen, this is still a Democracy, we need more time and the public needs to know the facts before a decision is made.
